INTRODUCTION

This report presents final 1971 Census totals and comparative 1966 figures by census tracts within the specified centres shown in the table below. Index maps outlining the relative locations of these census tracts in each centre are also included.

Census tracts are statistical units which have been established in 30 of the larger cities and census metropolitan areas. They are designed with a view to providing basic census statistics for homogeneous areas with respect to economic status and social living conditions. As far as possible, they are established as permanent areas and as such, are of further value in disclosing trends within sections of large urban communities. Census tracts were established in co-operation with local authorities requesting this type of information. Wherever possible, local committees were formed to delineate these areas.

In addition to the summary population totals contained in this report, two reports are being issued for each tracted centre — one providing distributions of 100 p.c. data ("A" series) and the other containing classifications of sample data ("B" series). Each report contains an Index map outlining the locations of the census tracts for that particular area. (See "1971 Census Catalogue" available from Statistics Canada.)

Census tract reports in the "A" series present basic distributions by age, sex, marital status, and mother tongue as well as family and household size and composition, and housing attributes of tenure, type of dwellings, number of rooms, and sanitary facilities.

Individual census tract reports in the "B" series contain data obtained in the 1971 Census on a sample basis (e.g., housing information on home values, rents, household facilities, etc., and population distributions on education, ethnic groups, religion, language, migration, occupation and industry groups, income, etc.).

The table below shows the number of tracts in each centre. The index maps appearing in this report are arranged in alphabetical order.

Le présent bulletin donne les chiffres définitifs du recensement de 1971 ainsi que les chiffres comparatifs de 1966 pour les secteurs de recensement situés à l'intérieur des centres énumérés dans le tableau ci-après. Il contient également des cartes-index faisant voir l'emplacement de ces secteurs de recensement dans chaque centre.

Les secteurs de recensement sont des subdivisions statistiques qui ont été établies dans 30 grandes cités et régions métropolitaines. Ils ont été conçus de façon à fournir les statistiques de base du recensement pour des régions homogènes quant à la situation économique et aux conditions sociales de vie. Autant que possible, ils sont des secteurs permanents et, de ce fait, ils permettent également de dégager les tendances à l'intérieur des grandes agglomérations urbaines. Les secteurs de recensement ont été établis en collaboration avec les autorités locales qui avaient demandé ce genre de renseignements. Des comités locaux ont été créés partout où il a été possible de le faire et chargés de délimiter les secteurs.

En plus des chiffres sommaires de population publiés ici, il existe deux bulletins par centre découpé en secteurs de recensement: l'un présente les répartitions des données intégrales (série "A") et l'autre des classements de données fragmentaires (série "B"). Chaque bulletin contient une carte-index qui délimite les secteurs de recensement de la région observée. (Voir le catalogue "Publications du recensement de 1971" qu'on peut se procurer à Statistique Canada.)

Les bulletins de la série "A" présentent des répartitions de base selon l'âge, le sexe, l'état matrimonial, la langue maternelle, la taille et la composition des familles et des ménages et certains attributs du logement comme le mode d'occupation, le genre de logement, le nombre de pièces et les installations sanitaires.

Les bulletins de la série "B" présentent des données fragmentaires tirées du recensement de 1971 (par ex., renseignements sur le logement: valeur, loyer, équipement ménager, etc., et répartition de la population selon l'instruction, le groupe ethnique, la religion, la langue, les migrations, la profession et le groupe d'activité économique, le revenu, etc.).

Le tableau ci-après donne le nombre de secteurs dans chaque centre. Les cartes-index du présent bulletin sont présentées par ordre alphabétique.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs de la Division du recensement de Statistique Canada.
